

Application No.: 09/744,772

2

Docket No.: C005 (136922002700)

In the claims

Claim 1 (currently amended): A method of copy protecting a digital audio compact disc carrying audio data and control data, wherein the control data is encoded onto the compact disc, the copy protection method comprising rendering selected control data incorrect, said selected control data being ignored by an audio player, such that an audio player is able to play the audio data, whereas the incorrect control data negatively effects the playability of the audio data in a data reader which is enabled to read data and process information from each sector of the compact disc.

The present amendment to Claim 1 reads on the specification at page 5, lines 12-13. If acceptable, the Examiner is authorized to make similar amendments to each of the other independent claims; see Claim 8 (line 6); Claim 12 (last line); and Claim 19 (line 6), immediately after the term "data reader."
